

VINYL BANNERS

PRODUCT CODE: V_BNR

Vinyl banners are a tried and true option for outdoor advertising. Easy to order, quick to produce, and easy to set up - it's no wonder these printed banners are widely used around Perth for everything from farmers markets to retail pop-ups.

Printed on heavy duty vinyl for ultimate weather resistance, vinyl banners are made to be used in full sun or rain and are highly durable. As a solid surface, vinyl banners are subject to movement in windy environments. We can include wind flaps to minimise any sail effect, however if you require a banner for long term use in high wind areas we suggest using a mesh banner instead.

+ MESH BANNER DETAILS

- Thick, durable 510gsm banner material
- Maximum banner height: 2100mm
- Maximum banner width: 10,000mm
- High resolution, full colour printing
- Supplied with clear eyelets and fixing rope
- Single sided or double sided print
- Finishing methods include: Ropes and eyelets, hemmed edges and eyelets or rod pockets
- Can be manufactured with wind flaps to minimise movement in high wind environments

ARTWORK NOTES

Artwork setup CMYK as the printing is full colour process.
Colour printed with ink on different media look different to the colours displayed on your computer screen. Please embed all images and make sure they are clear enough at printing size.

If you require a Pantone Match, then please provide relevant PMS details and we will endeavour to match as close as possible. A perfect match can not be guaranteed.

CMYK
 Pantone Match Please Specify:

This proof is for your careful approval prior to production. Please check thoroughly as the responsibility for its accuracy rests with you., Our valued client.

BLEED

This is the excess material that gets printed to allow for an edgeless print, with no colourless edges.

FINISHED SIZE

This is the size of the finished flag excluding the flag sleeve all stitches will go across.

SAFE AREA

In order to avoid vital artwork from being cut-off during sewing please keep all text and logos inside the dotted line.

UNPRINTED

This is the excess of the material that will not be visible. This remainder of the material will be hidden in the base
